Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown
Comments:

Is the evaluated use attainable? ☐ Yes ☒ No

Comments: The UAA was conducted in March, 2005 and no WBCR was observed. The stream met the average and maximum depth criterion in 1 out of 6 sites, however depth of this stream is regulated. An interview revealed that the stream exists between managed wetlands. Because of the overall shallow depth and regulated nature of the stream, the committee recommends removing the WBCR designation.

Committee Recommendation: ☐ Retain Use ☐ Modify Use ☒ Remove Use ☐ Inconclusive
